RING SIZER GUIDE

Want to order a ring, but don't know your size?
No worries, we'll help you out in no-time!

First things first: do you have a printer?

If yes - please print out this form in actual size (100%, none scaling). Check the printed size by measuring the line below. It should be exactly 5cm.

Place one of your perfect fit ring on the circles. When the inside edge of your ring matches the outside of the circle, you have found your match.

5 cm

If no, go find a fine piece of ribbon or dental floss. Wrap it softly around your finger and mark where the ends meet to measure the circumference. Release, fold open and measure the length - the number in mm matches your required ring size.
