

Calculate your *ring* size

You want to order a ring but you don't know your exact size?
Don't worry, we have the perfect tool for you.

- 1) Print the ring sizer (A4, 100%, no resizing) then place your ring on the circles to identify the diameter that corresponds to that of your ring.
- 2) To determine the best size for you, take a ring that fits perfectly and place it on the circle that has the most similar diameter.
- 3) If the inner circumference of the ring is perfectly aligned with the outer circumference of the circle, please choose the size indicated under the chosen circle.

Not convinced? We have a 30 days easy no-questions return policy.
